Subject: RE: Question on CA725 status for Navy-Bethpage

Yes, from what I know (we have multiple project managers on this site now), the residential soil work is the only hurdle currently to achieve the 725. Grumman has agreed to implement this work. In a perfect world, this should be done this fall.

Subject: FW: Question on CA725 status for Navy-Bethpage

Hi Dan - Not sure if Henry is away. As per the thread, below, Ben Conetta, one of the Section Chiefs in the RCRA program, has asked for an update on the status of the CA725 (human risk currently under control) determination for Navy-Bethpage. My understanding from previous discussions with Henry is that the off-site soil work is the main item that would need to be done before CA725 determination can be made. Just wondering if there might be a ball-park estimate of when soil work might be completed, and when it might be possible to do the CA725 determination. Thanks.

Hi Carol,

I am assuming no response?

Thanks again

Hi Henry and Steve - When you have the chance, please drop me a line regarding the status of the CA725 for Navy/Grumman Bethpage. (Pls also copy Ben Conetta (RCRA Section Chief) on your response.) Or, please feel free to call me when you have the chance regarding outstanding issues.

Thanks,
-Carol-

Hi Carol,

Going thru an exercise again re Grumman and the 725. Is there an update on the 725?

Thanks!!

Hi Ben- FYI. I wanted to let you know that I sent e-mails to DEC yesterday afternoon and then to both DEC and DOH today on the CA725 commitment. For New York State facilities, my the DOH also needs to provide input before the determination needs to be finalized, so I'll give them a little more time to respond. If I don't hear back from them by the end of this week, I'll call my DEC lead early next week.

Also, unfortunately I don't have an answer regarding the CA800 determination. Most of the land has been sold to others, but there are still some remedial systems operating at buildings of the former facility. This code is new to me, and Adolph sent me some information on it. Do you know if the State would have to do a formal justification before this code can be achieved?

Hi Adolph - In reference to the CA800 determination, does the entire facility have to be cleaned up for reuse in order for the CA800 to be achieved, or can a few SWMUs remain? (The last time I checked, there were a few swmus remaining that were undergoing corrective action.)

Regarding the CA725, I believe that the only remaining issue is the cleanup of contaminated soil on people's lawns. I will be contacting the State about the status, and I'll let you and Ben know if the CA725 can be achieved as soon as I find out.

Thanks,
-Carol-

Carol,

The Grumman Bethpage site is identified in the NYSDEC grant work plan (attached) as possibly receiving CA725 and CA800 (Ready for Anticipated Use) determinations by 3/31/15. Please let Ben and I know if either of these appears to be achievable. Thanks.

As discussed during today's branch meeting, please find attached the current NYSDEC work plan. Please review their list of potential sites for meeting GPRA goals by 3/31/15 beginning on page 32 (PDF pagination), get updates on status and communicate any issues or concerns to your supervisor. I'd like to get an update by the end of the calendar year; if this is not possible due to use or lose let me or Nidal know. Thanks.
